

Drinking Water

Access to safe water is essential to addressing poverty and health problems. Safe water is used for everything from drinking to crop production. Tanzania is arid with a long dry season, meaning that access to safe water is difficult.

A gift has been given in your honor to provide safe water for people in Tanzania to lessen disease, improve sanitation, create better farming practices, and build sustainable communities.

May you feel joy this Christmas through this gift to others in need, and in God's gift to us all, Jesus Christ.
